U.S. WIRELESS DATA: Cardservice International Begins Selling USWD's
Wireless *Express* *Payment* *Service*

December 04, 1998

Byline: Business Editors/Technology Writers

Cardservice International Begins Selling USWD's *Wireless* *Express*
Payment *Service*

AGOURA HILLS, Calif.--(BUSINESS WIRE)--Dec. 4, 1998--
Cardservice(R) International (CSI) announced today that it has begun
offering the *Wireless* *Express* *Payment* *Service*(SM) to existing and
potential merchant customers.

Beginning in late November after a brief training period, CSI
equipped its 2,200 person national sales force...

...payments.

CSI is a large independent processor of card, electronic, and
Internet payment transactions, and is 50% owned by First Data Corp.
(NYSE:FDC). The *Wireless* *Express* *Payment* *Service*(SM) (*WEPS*(SM)) is
a
proprietary service provided by U.S. Wireless Data, Inc. (USWD)
(OTCBB:USWDA).

To start the sales program, CSI has purchased from USWD 100
POS-500 point-of-sale terminals and 250 *WEPS*(SM) Enabler devices. The
POS-500 is a stand-alone point-of-sale terminal with integrated card
reader, printer, and wireless modem. The *WEPS* Enabler is an add-on
device that converts a merchant's existing POS terminal from using a
land line to wireless transmission.

Beginning early next...

...All of these devices,
including the wireless LinkPoint terminal will incorporate the USWD500
CDPD modem, designed specifically for processing payment transactions
over wireless networks.

The *Wireless* *Express* *Payment* *Service*(SM) is a comprehensive an
d
integrated set of equipment, wireless network, and server technology
designed to securely deliver and efficiently transmit payment
transactions from merchants to payment processors. *WEPS*(SM) utilizes
the USWD500 CDPD modem integrated into a variety of merchant terminal
devices.

It includes encryption and online diagnostic techniques. It uses
the Cellular...

...a transaction processing server to reformat
transactions and simplify the connections between wireless facilities
and processors' existing front-end systems.

From a merchant perspective, the *Wireless* *Express* *Payment*
Service(SM) provides faster transaction authorization, averaging three
seconds versus the 12 to 15 seconds using dial-up facilities. It
eliminates the need and cost of...

...Peirce stated, "CSI has a history of innovation in bringing new
technologies to the payments business. Getting the entire CSI sales
force mobilized behind the *Wireless* *Express* *Payment* *Service*(SM) is
a
validation of its value in the market."

Cardservice International is one of the fastest-growing
transaction processing companies in the United States...

US WIRELESS DATA: U.S. Wireless Data Announces Launch of *Wireless*
Express *Payment* *Service*

October 28, 1998

Byline: Business Editors

U.S. Wireless Data Announces Launch of *Wireless* *Express* *Payment*
Service

EMERYVILLE, Calif.--(BUSINESS WIRE)--Oct. 28, 1998--U.S. Wireless Data, Inc. ("USWD") (OTCBB:USWDA) announced today the availability of its *Wireless* *Express* *Payment* *Service*(SM).

The new service targets existing card processors who are looking to provide their merchant customers with a wireless payment solution. The first customer for the service will be Cardservice International, as announced separately on October 1st, pending the execution of a definitive agreement.

USWD's *Wireless* *Express* *Payment* *Service*(SM) integrates the company's proprietary hardware and software technology into an easy-to-use, end-to-end wireless transaction processing solution. The high-speed...

...by offering a technologically superior alternative to the current industry standard of dial-up terminals, and, for certain types of businesses, cash or checks.

The *Wireless* *Express* *Payment* *Service*(SM) begins at the point-of-sale and concludes with server interfaces into the front-ends of designated card processors. The service securely transmits transaction...

...reducing waiting time as much as 80% -- 3 seconds on average versus the 12 to 15 seconds for land-based, dial-up lines. In addition, *Wireless* *Express* *Payment* *Service*(SM) enhances security, including features such as data encryption to reduce the potential for fraud losses. The result: *Wireless* *Express* *Payment* *Service*(SM) outperforms dial-up lines at a fraction of the cost of leased lines.

As part of the Wireless Payment Service(SM) initiative, the company...

...the ability to provide wireless transaction processing solutions to the merchant population around the country where CDPD coverage currently exists.

From the merchant's perspective, *Wireless* *Express* *Payment* *Service*(SM) will provide maximum flexibility and mobility. The service will allow merchants the choice of purchasing a new piece of equipment or upgrading an existing...

... business and into the transaction-enabling business."

That transformation culminated recently with the signing of two major merchant acquirers, Paymentech and Maverick International, to its *Wireless* *Express* *Payment* *Service* (*WEPS*).

Using *WEPS*, US Wireless wants to help acquirers support the growing variety of wireless products and services on the market. *WEPS* is a server-based system that stands between the merchant and the bank. It takes transactions regardless of origin and reformats encrypted wireless transaction data into a language recognisable by acquirers.

Upon authorisation, *WEPS* receives the transaction back from the

acquirer, retranslates the data and sends authorisation to the terminal.
Wireless transactions can be authorised in less than five...

U.S. Wireless Data and First Savings Bank Sign Transaction Processing Agreement.
PR Newswire, p0157
April 7, 2000
Language: English Record Type: Fulltext
Document Type: Newswire; Trade
Word Count: 692

... announces that First Savings Bank Merchant Division (FSB) has executed an agreement with USWD enabling the bank to offer payment terminals powered by USWD's *Wireless* *Express* *Payment* *Service* (SM) (*WEPS* (SM)) to their merchants. Under the terms of the agreement, FSB can offer *WEPS*-enabled devices such as the Lipman 2090 countertop and the Intellect 9770 handheld terminals to address new merchant opportunities in segments such as fast food, transportation and goods/service delivery.

U.S. Wireless Data's *WEPS* is a comprehensive suite of wireless transport services and server technology designed to deliver payment transactions securely and efficiently from merchants to payment processors. The high-speed *WEPS* service supports encryption, real-time diagnostic capability, message re-formatting, communications protocol conversion and online, real-time reporting capabilities.

At 3-5 seconds to process a card transaction, *WEPS*-enabled handheld and countertop terminals can be faster than cash making them ideal for quick service restaurants. Merchants wishing to eliminate the cost of a dedicated phone line can realize substantial savings on monthly phone charges. Further, the mobility of *WEPS*-enabled terminals allows merchants in segments such as transportation or delivery to accept card payments securely at their customer's location. Lastly, the ability for merchants to view a list of transactions in real time from their own Web-based login to *WEPS* gives them a great deal of management control over terminals being used remotely or in the field.

"First Savings Bank, prides itself on responsiveness to our sales representatives and to our merchants," said Mike Ponder, president of First Savings Bank. "Being able to offer new payments solutions like *WEPS* can help those merchants be more responsive to their customers and gives FSB a tremendous competitive edge."

"It doesn't surprise me that an industry...

...card industry," commented Dean M. Leavitt, USWD chairman and chief executive officer. "USWD is proud to have a company of this caliber and experience embrace *WEPS* and we look forward to a long term and mutually beneficial relationship."

U. S. Wireless Data and The Horizon Group Sign *WEPS*(SM) Certified Service Center Agreement.

For All *WEPS*(SM) Terminals

EMERYVILLE, Calif., March 1 /PRNewswire/ --

U.S. Wireless Data, Inc. (OTC Bulletin Board: USWDA), the fore runner in the wireless payments industry has signed a Certified Service Center Agreement with The Horizon Group, under which Horizon will now have the added benefits of the *WEPS*(SM) service system to streamline their operations in the emerging "wireless world." Under the agreement, The Horizon Group will be activate terminals "Powered by *WEPS*" which will enable them to provide a "live terminal" within four hours to their client base. Not only that, but they now can communicate with the terminals "Powered by *WEPS*" and receive the detailed reporting necessary to provide the highest level of customer support with the real-time reporting capabilities via *WEPS*(SM).

U.S. Wireless Data's *WEPS*(SM) is an extensive offering of wireless transport services and server technology designed to deliver payment transactions securely and efficiently from merchants to payment processors. *WEPS*(SM) supports encryption, real-time diagnostic capability, message re-formatting, communications protocol conversion and online real-time reporting capabilities.

At 3-5 seconds to process a card transaction, *WEPS*(SM) certified handheld and countertop terminals are faster than cash making them ideal for quick service restaurants. No dedicated phone line is required with *WEPS*(SM) certified terminals and with that, savings on monthly phone charges can be realized. *WEPS*(SM) certified terminals will allow merchants in a mobile environment such as, transportation, and resort or service industry, to accept card payments securely. Finally, the real-time accounting capabilities, from their own private Web-based login to *WEPS*(SM), will give merchants a new management tool for terminals being used remotely or in multiple locations.

Rick Pityer, General Manager of The Horizon Group states, "Unlike the traditional dial-up terminals, the terminals powered by *WEPS*(SM) will always be on-line. This will allow our customer support center to troubleshoot the terminal without taking valuable time from the merchant or

CMS Signs Up for USWD's *Wireless* *Express* *Payment* *Service*(SM) -...

... the payments industry announces that Certified Merchant Services (CMS) has executed an agreement with USWD enabling CMS to offer payment terminals powered by USWD's *Wireless* *Express* *Payment* *Service*(SM) (*WEPS*(SM)) to their merchants. Under the terms of the agreement CMS can offer *WEPS*-enabled devices such as the Intellect 9770 handheld terminals to address new merchant opportunities in segments such as stadium/arena sales, taxi/limousine and goods/service delivery.

U.S. Wireless Data's *WEPS* is a comprehensive suite of wireless transport services and server technology designed to deliver payment transactions securely and efficiently from merchants to payment processors. The high-speed *WEPS* service supports encryption, real-time diagnostic capability, and online, real-time reporting capabilities.

At 3-5 seconds to process a card transaction, *WEPS*-enabled handheld and countertop terminals can be faster than cash, making them ideal for quick service restaurants. Merchants wishing to eliminate the cost of a dedicated phone line can realize substantial savings on monthly phone charges. The mobility of *WEPS*-enabled terminals allows merchants in segments such as transportation or delivery to accept card payments securely at their customer's location. Finally, the ability for merchants to view a list of transactions in real time from their own Web-based login to *WEPS* gives them a great deal of management control over terminals being used remotely or in the field.

"It doesn't surprise me that an industry...

...offers the card industry," commented Dean Leavitt, USWD chairman and chief executive officer. "USWD is proud to have companies of this caliber and experience embrace *WEPS* and we look forward to a long relationship."

"Our success can be directly attributed to our commitment to providing our merchants with high quality solutions that fit their needs," said Jon Frankel, President of CMS. "With *WEPS* we not only have a way to satisfy our customers' requirements for mobile payment technology, but we

have a solution that our competitors can't...

... processor based in Tucson, AZ, today announced a two-year transaction processing agreement. Under the terms of the agreement, Maverick International will offer USWD's *Wireless* *Express* *Payment* *Service*(SM) (*WEPS*(SM)) to its existing and prospective customers for high-speed wireless credit card authorizations.

Dean Leavitt, USWD's chairman and chief executive officer stated, "Wireless card processing has become a requirement for the suite of services offered by transaction processors. Our *Wireless* *Express* *Payment* *Service* product provides a conduit for processors to easily implement and manage their individual wireless strategy."

U.S. Wireless Data's *WEPS* is a comprehensive suite of wireless transport services and server technology designed to deliver payment transactions securely and efficiently from merchants to payment processors. The high-speed *WEPS* service supports encryption, real-time diagnostic capability, and online, real-time reporting capabilities.

One feature of the *WEPS* service is the ability for merchants and merchant acquirers to access terminal, account and transaction information via a secure Internet web site. This feature represents...

...Maverick has made a significant investment in wireless transaction processing over the past two years and has cemented its commitment to wireless by adopting the *Wireless* *Express* *Payment* *Service*.

"Maverick has employed a strategy of offering customized software and client/server technology for its customers thus enhancing the value of client relationships," said John Hunnicutt, chairman and chief executive officer of Maverick International, "*WEPS* is a perfect complement to our product offering."

**Domino's Pizza Utilizes U.S. Wireless Data's *Wireless* *Express* *Payment*
Service for Credit Card Authorizations.**

... Bulletin Board: USWDA), the leader in applying wireless technology to the payments industry, today announced the successful completion of a technology trial of USWD's *Wireless* *Express* *Payment* *Service*(SM) (*WEPS*) at Domino's Pizza locations. Domino's Pizza, Inc. is including *WEPS*(SM) in their product line as an approved wireless card payment service for over 6,300 of its company-owned and franchised locations. As part of the range of services offered by Domino's to its stores, *WEPS*(SM) is now available to owners who require credit-card authorizations in under 5 seconds without the monthly cost of maintaining a phone line.

"At the end of the trial *WEPS* had proven itself in the Domino's environment," said Colleen Sova, Customer Service Manager at Domino's. "As a result, we are able to offer...

...our franchisees that have a business need for high speed credit card transactions."

The technology trial, conducted in two locations, proved the reliability of the *WEPS* technology in those locations and demonstrated the benefits of credit card transactions that are "as fast as cash." Domino's Pizza, a leader in adopting...

...What better endorsement of the technology and fit for the fast food restaurant industry than to have a world-class company like Domino's offer *Wireless* *Express* *Payment* *Service*(SM) in their product line to all of their franchise partners and company-owned locations," said Dean Leavitt, Chairman and CEO of U.S. Wireless Data. "We are excited by the success of this trial and are looking forward to replicating that success throughout the Domino's network."

WEPS is a comprehensive suite of wireless transport services and server technology designed to deliver payment transactions securely and efficiently from merchants to payment processors. The high-speed *WEPS* service supports encryption, real-time diagnostic capability, and online, real-time reporting capabilities. ... terminal providers, acquirers, or independent sales organizations -- the transaction-processing sales agents known as ISOs. Its new direction revolves around Wireless Express Payment Services, or *WEPS*, a proprietary "middleware host" that serves as a "funnel" for wireless transactions.

"We allow the transaction to come into us in a variety of different

...

...standardized world of dial-up terminals, the wireless transport market is disjointed and complex and poses new challenges for the payments industry. Mr. Leavitt envisions *WEPS* as the equivalent of a "wall plug" for the wireless part of the payment industry.

WEPS uses the CDPD -- cellular digital packet data -- standard and American Mobile Satellite's ARDIS data transmission system. It plans to incorporate Mobitex -- owned and operated...

...Cardservice International Inc., Chase Merchant Services, Westamerica Bank, and Paymentech.

Equipment makers such as Hypercom Corp., Lipman U.S.A. Inc., and Intellect have endorsed *WEPS*. Deals with sizable processors such as Vital Processing Services, National Data Corp., and Concord EFS Inc. are in the works, Mr. Leavitt said.

"We have been successful in signing over 30 *WEPS* agreements," he said, calling that "an obvious validation that what we're doing is very much wanted in the marketplace."

U.S. Wireless, which is...

...themselves, and it's, frankly, one that was sorely needed," said George E. Devitt, senior vice president of global marketing for Hypercom Corp. in Phoenix.

WEPS enables merchants to exploit wireless technology more easily and saves Hypercom work and time, Mr. Devitt said. "If Vital wanted to accept transactions from four...

...Calif.-based ISO, said his company has supported U.S. Wireless in good times and bad. "Finally, they've got their act together with this *WEPS*," he said.

No one else is serving in the much-needed role of "traffic cop" for wireless card payments, said Caesar Berger, senior vice president of product development at Cardservice. For example, though First Data, which processes for Cardservice, cannot connect a merchant to a CDPD network, *WEPS* enables Cardservice to offer CDPD to its merchants. "They're resolving the problem of connectivity," Mr. Berger said.

In the past, the high entry costs...

...converging with those of wireline.

A wireless payment terminal five years ago may have cost \$2,500, compared with \$750 now, Mr. Leavitt said. With *WEPS*, the cost of a transaction is 5 cents, one-tenth what it was five years ago. A wireless transaction can be completed in three to...

U.S. Wireless Data's *WEPS*(SM) Technology Used for Ticket Sales at San Rafael

Millennium Party

... and Jerry Lee Lewis and was attended by over 8,000 people. USWD and Westamerica Bank provided point-of-sale technology powered by USWD's *Wireless* *Express* *Payment* *Service* (SM) (WEPSSM), to eliminate the need for phone lines and help reduce ticket lines. The service performed flawlessly through the millennium date change.

U.S. Wireless Data's *WEPS* is a comprehensive suite of wireless transport services and server technology designed to deliver payment transactions securely and efficiently from merchants to payment processors. The high-speed *WEPS* service supports encryption, real-time diagnostic capability, message re-formatting, communications protocol conversion and online, real-time reporting capabilities.

At 3-5 seconds to process a card transaction, *WEPS*-enabled handheld and countertop terminals can be faster than cash making them ideal for the long queues typical of event sales. Merchants wishing to eliminate...

...and monthly phone charges. Also, the ability for concessionaires to view a list of transactions in real time from their own Web-based login to *WEPS* gives them a great deal of management control over terminals being used remotely.

"USWD was very happy to play a part in helping people ring in the New Year," commented Dean M. Leavitt, Chairman and CEO of U.S. Wireless Data. "We had prepared *WEPS* extensively to be ready for Y2K and we are glad it performed so well for San Rafael's citizens and our partner in business, Westamerica..."

... President of Operations at Westamerica Bank. "We believe there are many applications for wireless credit card terminals and we are looking forward to actively promoting *WEPS* to our merchant prospects."
